

ETOILES OY SUOMI

We offer effective odor control systems to solve odor troubles around buildings, industry, wastewater treatment plants and biogas plants.

Thanks to our long experience we can provide our products with reliability guarantee.

Contact us, we want to help you!

Waste water treatment

Based on a long experience Etoiles OdourMikko series are developed to solve odor removal difficulties in waste water pumping stations and wastewater treatment plants. Great experiences improving the living and working environment have been achieved with the method.

Example targets:

- The waste water pumping stations of water co-operatives and waste water transfer lines with a strong formation of hydrogen sulphide due to long lag times.
- And other parts of the waste water treatment with extraction.

Waste treatment

Etoiles OdourMikko-series have been developed to solve odor removal challenges from waste compactors, trash rooms and waste treatment plants.

With the method there have been great experiences in the air quality of business premises and trash rooms. Work satisfaction and imago improvement have been achieved by filtering the air from compounds.

Also corrosion caused by the gases has reduced in the compactors: As an advantage a longer service life for the products.

- Waste rooms' air treatment in the basement of block of flats and business premises.
- Compactors located in the markets' courtyards or nearby.
- Solutions placed in the air processing of the waste treatment plants

Industries

Tailor-made odour removal
solutions for your site
1-80 000 m³/h

OdourMikko products

As a result of our long product development work, we have brought completely new products to the market. The basic products are industrially shaped and large units are welded from PE plastic. OdourMikko solutions include both naturally aspirated models and fan-assisted models.

**OdourMikko
2 Free**
(1-2 m³/h)

**OdourMikko
10 Free**
(10 m³/h)

**OdourMikko
50-100 Free**
(50 and 100 m³/h)

We deliver all kinds of activated carbons which are suitable exactly for your needs. Activated carbons can be used for odor removal for example in waste water pumping stations and waste water treatment plants. In addition we deliver carbons to biogas plants and many other targets.

Environment service Etoiles

We have over 15 years' experience on odor removals. Therefore, we can promise a satisfaction guarantee to our delivered products. Our specialists have solved over 4 000 problems including industries like waste water pumping stations and waste management.

Via our retailers products are available also in Estonia, Sweden, Denmark and Norway.
